UCSF's Highest Award to Three at Founders Day Banquet Apr. 6; Top Honors to Twelve at Luncheon

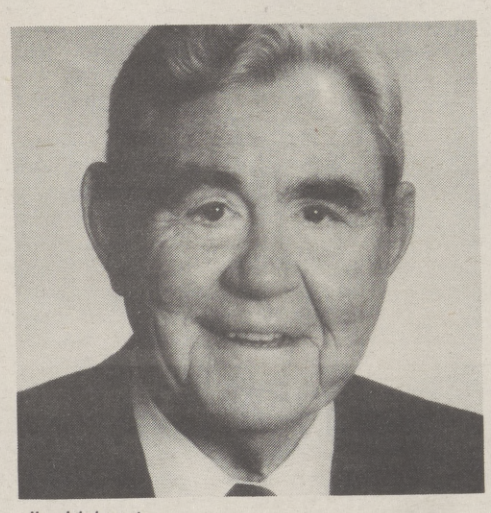
The campus will award its highest honor—the UCSF Medal—to Ellen Brown, MD, James P. Livingston, and William O. Reinhardt, MD, during Founders Day on Thursday, April 6. The three will be recognized for their extraordinary commitment to the campus.

Professor emeritus of medicine since 1979 and a senior staff member of the UCSF CVRI, Brown graduated from UCSF in 1939 and has remained on campus for many of the last 50 years working to improve the teaching of predoctoral medical students. She initiated the "Introduction to Clinical Medicine" course and presently serves as a residency evaluator for the School of Medicine. She is a life member of the UCSF Chancellor's Associates.

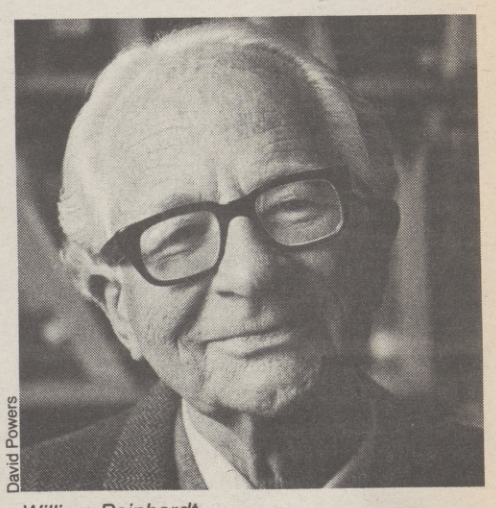
Livingston is a member of the UCSF Board of Overseers and the UCSF Foundation Board of Trustees, and is a founding co-chair of the UCSF Chancellor's Associates. In 1986 he and his wife, Marjorie, established the first UCSF School of Nursing Chair. Livingston is a director of National Medical Enterprises.

Reinhardt graduated from UCSF in 1938. An associate dean emeritus of the School of Medicine since 1977, he is well-known for his studies of the lymphatic system. He served as chair of anatomy from 1956 to 1963, and dean of the School from 1963 to 1966. Reinhardt's vision helped bring UCSF to the forefront of health science research.

Ellen Brown



Jim Livingston



David Powers

William Reinhardt

The three will receive their awards at the Founders Day banquet at the St. Francis Hotel beginning at 6:30 p.m. (black tie optional). For further information call x64723.

● **The 32nd Faculty Research Lecture** will be delivered earlier in the day by Ira Herskowitz, PhD, professor and vice chair of biochemistry and biophysics, and head of the Division of Genetics. The annual lectureship, sponsored by the Academic Senate, is the highest honor the UCSF faculty bestows on one of its members. Herskowitz will discuss "Extracting Everything Possible from a Single Cell: The Molecular Basis for Cell Specialization in Yeast" at 2 p.m. in Cole Hall.

Preceding the Faculty Research Lecture will be a special invitational awards luncheon

(continued on page 2)

UCSF/Mount Zion: One Step Further

The UC Board of Regents at its March 17 meeting voted to accept the statement of the UC Regents' Committees on Hospital Governance and Finance that the integration of the UCSF Medical Center and Mount Zion Hospital and Medical Center would "promote the University's interest in clinical service, education and research, and would benefit Mount Zion and the community it serves."

The Regents agreed that implementation documentation and an Environmental Impact Report (EIR) covering the integration should be prepared. No University decision on integration will be made until the Regents have reviewed and considered all such environmental and implementation documents and have the advice and recommendation of the UC President.

The boards of Mount Zion Health Systems and Mount Zion Hospital and Medical Center had met on March 14 and voted unanimously to pursue the proposed integration.

To maintain the pre-eminence of UCSF's clinical programs, the campus needs additional patient care and related clinical facilities to continue to recruit and retain medical school faculty, to provide patients with state-of-the-art health care and to provide clinical experience for medical students and residents.

Under the proposed integration, UCSF would become responsible over time for programs and finances of Mount Zion. After a transition period of approximately 30 months, UC would have a controlling majority on the Mount Zion Board.

"As autonomous institutions, Mount Zion and UCSF already have undertaken successful joint programs to meet community

David Powers

Arnaud Heads New Division of Geriatrics and Gerontology with Mount Zion

To help meet growing needs for medical care of the elderly and research on aging, the Department of Medicine has established a new Division of Geriatrics and Gerontology in collaboration with Mount Zion.

Claude Arnaud, MD, professor, medicine and physiology, has been named chief of the new division. Arnaud will coordinate growth of patient care, teaching and research programs in geriatrics at the Parnassus site, Mount Zion, the VAMC and SFGH.

Division chief Arnaud also will direct a new Center for Biomedical Research on Aging with his offices and laboratories located at Mount Zion. The UCSF Department of Medicine and Mount Zion's San Francisco Institute on Aging will join forces in the Center to study how people age and the disabilities associated with aging.

Arnaud is widely respected for his contributions in endocrinology and metabolism, including research on osteoporosis and other health problems that face the elderly.

"Growth in the number of elderly Americans is the single most important demographic change in our country since the turn of the century," he says. "This change can be welcomed as a challenge that will lead to a richer, wiser America. But left ignored, it could become burdensome and result in the inhumane treatment of our mothers, fathers, sisters and brothers—and indeed of ourselves."

We know too little about the aging process to uniformly prevent or slow the progress of diseases that affect older people, Arnaud emphasizes. "This is why geriatrics today is almost synonymous with the care of incapacitated elderly rather than extending the health span of our older citizens." A recent report of the Institute of Medicine of the National Academy of Sciences urged a dramatic increase in fundamental biomedical research on aging, he adds.

A Tribute to Carol

"I really can't believe this," said child and family advocate Carol Hardgrove (far left) as friends, colleagues and family streamed into Toland Hall last week to show their praise for her. The School of Nursing, where Carol is professor emeritus in the Department of Family Health Care Nursing, renamed the Annual Lecture on Child Day Care in her honor. The event included a panel discussion featuring several individuals who worked with Carol during her UCSF career (left to right) Mary Tesler, family health care; Inez Wieging, pediatric surgery; Betty Highley and Doris Dunbar, family health care; Deborah Ablin, Koret Family House; Patricia Calarco, anatomy. A reception followed at the Child Care Study Center, which Carol and Pat Calarco helped develop.

AIDS Food Drive Apr. 10-14

Nearly one hundred thousand people have been diagnosed as having AIDS. Some are more unfortunate than others, because they have little money. Their dollars are spent on housing and medication to thwart their illness.

But you can help.

The Fourth Annual UCSF Food Drive to benefit the San Francisco AIDS Foundation Food Bank will be held the week of April 10. The Food Bank provides food and toiletries to hundreds of men and women every month. All of the people who depend on the Food Bank have AIDS or ARC and an income of less than $700 a month.

Here's how it works: During the week, boxes will be placed all over campus. Just drop off whatever food items you can, anytime during the week. Volunteers will regularly empty the boxes and at the week's close will deliver the items to the Food Bank.

Organizers of the Food Drive now are looking for volunteers who can copy and distribute informational flyers on campus, keep a small box near their desk for co-workers to drop off food, and drivers with trucks who can help with the final delivery. If you can help with any of the above, call Fred McEnroe at x65186 or Bob Schwartz, x64714.

The Food Drive is organized by the UCSF Gay Men's Union and co-sponsored by the Academic Business Officers Group, the Managers Advisory Group, the Staff Advisory Committee, the UCSF Staff Council and the Women's Resource Center.

The next time you go to the grocery store, why not pick up an extra can of corn or an extra box of cereal? Maybe a roll of toilet paper or a jar of peanut butter. It really doesn't take much. And you'll be making a contribution that is immeasurable.

Remembering Dorothy Bradley

Research & Development Lab director Freeman Bradley (far left) stands with his family in front of a painting that was dedicated last Thursday in memory of his wife, Dorothy, a clinical social worker for 16 years at UCSF, who died last June. The oil painting of the Golden Gate Bridge, by artist Norman Feterson, hangs in Long 885. Immediately following the Social Work dedication, a mini-park behind the School of Dentistry also was dedicated in Dorothy's memory by Research & Development and Academic Affairs.

Pierre McCrea

Cell biologists jostle for position as graduate student Dawne Page explains all about second messengers and B-cells.

A B-Cell Turn-On

Over 100 students, postdocs, faculty and technicians were at the Faculty/Alumni House last Thursday to view each others' work during the UCSF Cell Biology Program's poster session. On display at this first-time campus event were some 25 posters revealing an assortment of the on-going work taking place within the 26 labs that compose the program.

The Cell Biology Program is directed by a committee headed by Reg Kelly, and presently unites labs from the anatomy, stomatology, biochemistry, physiology, pharmacology, pathology, pharmacy and microbiology departments.

"The whole concept of this event was to present our work in an abbreviated, less formal form, and thereby bring together a broad range of people to discuss projects of interest in greater detail," explained Pierre McCrea, who together with fellow pharmacology postdoc Marc Symons, organized what will likely become a biannual event.

According to Pierre, this was the first time the Faculty/Alumni House was used for a campus-wide poster session. For further information on how to organize such ar. event, call Stan Estoll, x64723.

中毒急救方法

Elise Stone (bottom photo, left), health education coordinator for the SF Bay Area Poison Control Center at SFGH, explains to members of the Chinese community important information on a poison prevention poster. The Poison Center has posters in English, Chinese and Spanish, and emergency action cards in 10 different languages.

Over the next few months, Elise, with the help of our Office of Public Service Programs, will be meeting with members of several non-English speaking communities—Filipino, Hispanic, Vietnamese, Cambodian, Laotian, Hmong, Korean and Ethiopian—to explain how to deal with poison prevention in the home.

The Poison Control Center also has just started using an interpreter service. The Center is open 24 hours a day and can be reached at 476-6600, or toll-free 1-800-523-2222 in the 415 and 707 area codes.

When Irish Heads Are Smiling

Educational Media Resources

A delegation from Cork, Ireland, one of San Francisco's "Sister Cities," paid a visit to our campus on March 3. As part of the Sister City relationship, our campus participates in a faculty and student exhange program with the College of Cork. Confirming the commitment are (head to head, left to right) Brian Nason, consul general; Leo Walsh, assistant administrator, financial affairs, SF Department of Public Health; David Ramsay, UCSF senior vice chancellor, academic affairs; Michael Mortell, president, Cork College; Chancellor Krevans; Bernie Allen, mayor of Cork; Michael Reardan, San Jose radiologist; Patrick McKernan, ambassador from Ireland to the US.

Medical Women's Retreat

The UCSF Women Medical Students' Association invites all female medical faculty and students to attend a retreat entitled "Women in Medicine: Shaping the Future" on Saturday, April 15, at the Marin Headlands Institute. Preregistration is required by Monday, April 3. For further information call Gerda Tapelband at 759-9816 or Erica Breneman at 282-9576.

Founders Day *(continued)*

at noon in the Millberry Union gym. Twelve members of the campus community will be honored as follows:

- **The Chancellor's Award for Public Service** will go to David A.O. Bracker, special projects coordinator for Personnel & Student Services, for his long-term dedicated service to a variety of community organizations, especially in the Mission District; Janet D. Cole, administrative analyst, School of Medicine, for her generosity and support of immigrants and refugees; and Daniel M. Wlodarczyk, MD, assistant clinical professor, medicine and family & community medicine, at SFGH, for his consistent and dedicated efforts to bring medical care to the poor and homeless of San Francisco.
- **The Chancellor's Award for Exceptional University Service** will go to six staff employees: Alegandro A. Avila, senior lead storekeeper, materiel management (at UCSF 28 years); Stephen C. Cox, administrative assistant II, interventional radiology (13½ years); Carol N. Inaba, administrative assistant II, Department of Medicine (24 years); Adrienne W. Lewis, unit services coordinator III, 6 Long (13 years); Delores Mays, senior vocational nurse, 10 Long, (26½ years); and Blanche White, senior hospital assistant, Intensive Care Unit (25 years).
- **The Distinguished Nurse Award** will go to Amy Gunn-Milton, clinical nurse III, inpatient nursing, for her exceptional leadership and inspirational role in developing of the Extracorporeal Membrane Oxygenation Program in the Intensive/Special Care Nursery and for chairing the nursery's Joint Practice Committee.
- **The Jeanne M. Yalon Memorial Oncology Nurse Award** will be presented to Stephanie Schlueter, clinical nurse II, 11 Long, for her high level of professional and clinical skills exemplifying nursing on the highest level.
- **The Helen B. Ripple Award for Excellence in Neuroscience Nursing** will go to Margery Wolcott, head nurse, 8 NE, for her commitment over the last 18 years to nursing and the neurosurgical patients on 8 NE.

Other special activities surrounding our Founders Day include:

- **Poster Session and Research Contest.** Hosted by the Graduate Students' Association in conjunction with the Graduate Division, Sigma Theta Tau, the Chancellor's Office and Beckman Instruments, Inc., the research forum will be held from 10:30 a.m. to 2:30 p.m. in Toland Hall, while the posters will be on display from 10 a.m. to 4 p.m. in the School of Nursing mezzanine. A reception will be held in the mezzanine from 3 to 4 p.m.
- **A poster** featuring a reproduction of a monotype by California artist Sam Francis is being used as the theme for this year's celebration.

See the April 22 issue of *Newsbreak* for a special full-page spread of Founders Day pictures.

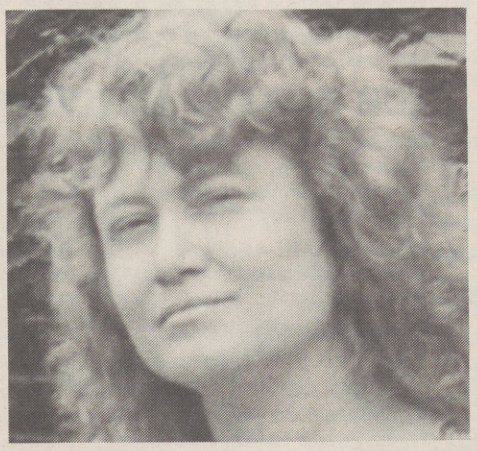
Honors & Awards

Feduska

Nicholas J. Feduska, professor, surgery: Elected president of the Western Association of Transplant Surgeons.



Tarlen

Carol Tarlen, secretary II, family & community medicine: Winner of a department staff award for her work on the School of Medicine's Preceptor Program from 1982-1988, which matched 150 first-year students with primary care physicians. She also won a Community Service Award from the department for her work in distributing food to the homeless.

Kathleen L. McCaffrey, director, medical records: Appointed to the Hospital Data & Public Information Committee of the CA Health Policy & Data Advisory Commission.

C. Elliott Sigal, instructor, medicine & CVRI: Winner of a 1989 Arthritis Investigator Award from the Arthritis Foundation.

Randolph Falk

Kaban

Leonard B. Kaban, professor & chair, oral & maxillofacial surgery: Winner of the 1989 research award of the American Association of Oral & Maxillofacial Surgeons to conduct his work on "Wound Healing & Facial Growth after Fetal Cleft Lip Repair in Rabbits."

Wesley Wong

Bishop

David Bishop, university librarian: Winner of the 1989 President's Award from the Medical Library Association. Bishop and his colleagues, Louise Darling of UCLA and Lois Ann Colaianni of the National Library of Medicine, were recognized for editing the current edition of the *Handbook of Medical Library Practice*, the definitive text on health sciences librarianship.

Promotions

Promotions are made available to this publication after they are processed by the Personnel Department.

Douglas Blumer, work management assistant II, physical plant.

Joan Drues, programmer/analyst II, general internal medicine.

Linda Fraser, administrative assistant III, neurology.

Daniel Orozco, administrative analyst, psychiatry.

Joan Parker, administrative assistant II, surgery.

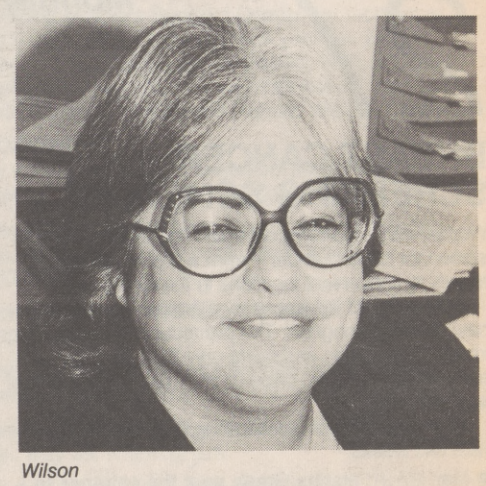
Marcia Stubblebine, staff research associate II, ob/gyn.

Publications

Elfrieda Shukert, senior typist clerk, library administration: Co-Author, *War Brides of World War II* (Penguin, NY, 1989).

Knopp

Robert K. Knopp, associate clinical professor, family & community medicine & medicine: Winner of the 1988-89 Faculty Research Award from the UCSF Medical Education Program, Fresno, for his work on "Mechanism of Injury & Anatomic Injury as Criteria for Pre-Hospital Trauma Triage." He will receive $1000 from the UC Valley Medical Education Foundation to continue his work.



Wilson

Jacqueline Wilson, collection development/ education officer, library: Selected as local assistance chair on the Medical Library Association (MLA) National Program Committee for their annual meeting to be held in San Francisco in 1991. She also will serve as 1989-90 chair of the MLA Publishing & Information Industries Relations Committee.

Trio d'Amsterdam Performs Apr. 11

The Trio d'Amsterdam will perform on campus on Tuesday, April 11, at 5:30 p.m. in Cole Hall.

This is a unique ensemble of musicians living and working in Amsterdam who perform works of Haydn, Mozart, Beethoven and others on instruments which were known to the composers in their day. Eric Hoeprich will play a 200-year-old clarinet, with Stanley Hoogland on the pianoforte and Tanya Tomkins on the cello.

For the April 11 performance, the trio will perform Mozart's *Kegelstatt Trio*, Weber's *Sylvana*, and Beethoven's *Trio in B Flat*. Joining the group for the *Kegelstatt* will be guest artist Lucy van Dael, concert mistress and violist with the Franz Bruggen Orchestra of the 18th Century.

Tanya Tomkins is no stranger to this campus. She is the daughter of the late UCSF biochemist and musician Gordon Tomkins, and has performed at special UCSF events on several occasions.

Tickets at $7 general, $5 UCSF staff and faculty, and $3 UCSF students will be available at the door beginning at 5 p.m. A wine and cheese reception will follow the concert. For further information call x62542.

The evening's entertainment is co-sponsored by Arts & Lectures and the Departments of Biochemistry & Biophysics and Pediatrics.

New Library Hours

The UCSF Library will open the Reserve Book Room three hours earlier—at 9 a.m.—on Sundays throughout the spring quarter from April 1 to June 18. (The remainder of the library will continue to open at noon). If this new time is popular, we can expect these extended hours to continue. For further information call Alicia Escoto, x68042; Tina Quiros, x68430; or Kenneth Weeks, x68053.

What To Do With 8,000 Extra File Folders

Deanna Thomas of Apple Computers the other day found that she had 8,000 new file folders, worth about $2,000, for which she had no need. She decided to call our School of Medicine Dean's Office to see if they might help find a use for them.

No problem. The new files have been divided among the UCSF Center for the Study of Social & Behavioral Sciences, the Haight Ashbury Free Clinics—now operating at Laurel Heights since a major fire destroyed their facilities on Haight Street (they will be there through February 1990), and the Bayview Hunters Point Foundation.

The Dean's Office and all the file recipients give a big thanks to Apple.

Service Awards

Service awards are issued on staff members' tenth anniversary of employment (or longer, in increments of five years). Names are provided by Personnel as awards are processed. Campus and Medical Center departments should send criteria to Personnel as employees become eligible for service awards.

Rita Abelardo, 15 years, CVRI.

Bonita Anderson, 10 years, respiratory care.

Cynthia Barton, 10 years, 10 Long.

Janet Beck, 10 years, anatomy.

Eula C. Blackshear, 30 years, admissions.

Judith Borland, 15 years, CVRI.

Theresa L. Braun, 10 years, epidemiology & international health.

Helen P. Carbajal, 15 years, School of Medicine Area Health Education Center, Fresno.

William F. Chapman, 10 years, dermatology.

Florence Chin, 10 years, Chancellor's Office.

Annie Chow, 10 years, clinical labs.

Katherine Y. Chu, 20 years, hematology lab.

George W. Clark, 25 years, physical plant.

Beth Ann Cost, 10 years, CVRI.

Parry Dent, 10 years, postpartum nursing.

Mary Devine, 20 years, surgery.

Maria Dominguez, 15 years, clinical labs.

Allan F. Eng, 10 years, building maintenance.

Nora Forgey, 10 years, postpartum nursing.

Nayeema M. Hai, 10 years, clinical labs.

Annie S. Holly, 25 years, radiology.

Helen Houston, 20 years, nursing service.

James P. Houston, 25 years, physical plant.

Marie E. Hugenberg, 30 years, surgery.

Ken E. Irvine, 10 years, general internal medicine I clinic.

Edward Johnson, Jr., 40 years, environmental services.

Joan Junkin, 10 years, CVRI.

Kathleen Kushner, 15 years, clinical laboratories.

Bonnie A. Lord, 10 years, anatomy.

Patricia A. MacDonald, 10 years, CVRI.

Mitsue Y. McKenna, 15 years, dermatology clinic.

Gloria Morris-Lewis, 10 years, nursing service.

Katherine Moskwin, 10 years, neurosurgery.

Kathryn Nagafuji, 15 years, 12 Long.

Jean A. Nellenbogen, 30 years, CVRI.

Nola M. Nelson, 15 years, environmental services.

Imelda F. Orlina, 10 years, anatomy.

Glenda Reifenrath, 10 years, pathology.

Edizer M. Rios, 10 years, environmental services.

David A, Rzepka, 10 years, computer center.

Ma Luaz C. Santos, 15 years, pharmaceutical services.

Leslie Scheurer, 10 years, 9 Long.

John W. Shaver, 15 years, environmental health & safety.

Mark S. Singer, 10 years, anatomy.

Holly L. Slade-Coe, 10 years, labor & delivery.

Andrew P. Smith, 10 years, pharmacology.

Leavia Sotomayor, 15 years, accounting.

Anne Strubbe, 10 years, CRI.

Nancy Swanson, 20 years, nursing service.

Edward F. Thompson, 30 years, campus housing.

Stella S. Tse, 15 years, immunology laboratory.

John Turner, 20 years, materiel management.

Sandra Tye, 20 years, medicine.

Elsa B. Velasco, 15 years, nutrition & dietitics.

Eunice Waligora, 10 years, surgery.

Charles E. Walters, 25 years, physical plant.

Rose K. Wang, 10 years, anatomy.

Today/Tomorrow

25 Saturday

BREAST CANCER SCREENING SCHEDULE

Women can have low-cost mammograms—x-rays to screen for breast cancer—from a mobile van that travels to convenient locations in the Bay Area.

Women need the approval of their physicians to have the mammogram. The procedure takes approximately 20 minutes and costs only $50. To make an appointment call 990-0459 or x62193 between 9 a.m. and 3:30 p.m.

The van will be at the following locations for the next two weeks:

- Mar. 27-31: Marina Green near the entrance to Ft. Mason.
- Apr. 3-7: Westlake Shopping Center on Park Plaza Dr. near Safeway.

OTOLARYNGOLOGY CONFERENCE: *Technical Aspects of Radiation Therapy.* Keith Weaver, Rad. Onc. *Anatomy of Infra-Temporal Fossa.* Teri Dixon, Anat. S 214. 8-10 a.m.

RECOMBINATION MINICOURSE: *Recombination in Yeast.* Thomas Petes, U No. Carolina. Second in a series of four lectures on *Mechanisms of Recombination: Application to Gene Targeting in Mammalian Cells*. S 214. 10:30 a.m.-noon.

RADIATION ONCOLOGY RESEARCH LABORATORY SPECIAL SEMINAR: *Cell Survival Measured by In Situ Colony Formation in a Mouse Carcinoma: Correlation with Growth Delay & Local Control.* Roland Guttenberger, Inst. for Radiobio., Munich. CED 200. Noon.

OVEREATERS ANONYMOUS MEETING: *The "How" Concept.* Speaker to be announced. N 417. Noon. Call Lia, x64251.*

Tear gas certification by UCSF Police Dept. Personal Safety Prog. Sat., Apr. 22. 9 a.m.-noon. Personnel Conference Rm., 1350 7th Ave. $12. Pre-registration required. Call x65683.*

CPR CLASSES

UCSF CPR Center's 3-4 hour course in basic cardiopulmonary resuscitation. Thurs., Apr. 6 & May 25; Sat., Apr. 29 & May 13. N 229. 9 a.m. $20 & $5 for one additional household member. For information & registration call x61817.*

MELVYL/MEDLINE EXPANDED ACCESS

MELVYL/MEDLINE is now available, at no cost, to UCSF faculty, students & staff from any location, including offices, labs & hospitals, that will connect with campus Ethernet or a terminal with modem, as well as from the library terminals. UCSF Library offers frequent seminars on MELVYL/MEDLINE searching techniques, as well as written guides & personal assistance. For further information call the Reference Desk, x62337.

HELP ELIMINATE SCHEDULING CONFLICTS

In order to help the campus avoid conflicts in scheduling important events, the News & Public Information Services Department has a computerized calendar. It is suggested that faculty, students and staff call x61541 when they are planning an event to make sure nothing has been scheduled for that date. Please note that in order to reserve campus conference rooms and auditoriums, it is still necessary to call Millberry Union at x62571, Room Reservations at x64436, Faculty/Alumni House at x64723, Laurel Heights at x68100 or the individual school or department.

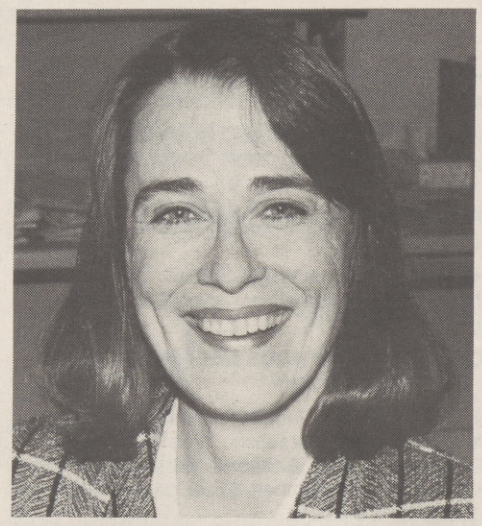
Benefits/Personnel

Meet Anne Kopp, New FSSAP Counselor

The Faculty, Staff and Student Assistance Program (FSSAP) recently welcomed clinical psychologist Anne Kopp as a third member of the counseling staff.

Her background in mental health work—which goes back to 1973—includes experience in similar programs. She served on the staffs of the counseling centers at both San Jose State and USF. Most recently she worked for a private psychological consulting firm in Napa that served various city government agencies, including city councils, police and fire departments.

One of her particular areas of interest is working with family problems—epecially those of working parents (being herself a mother of three-year-old twins). Other areas of interest include stress management, consulting with supervisors and working with police officers.



For those who are new to UCSF, the purpose of FSSAP is to provide a place where members of the campus community can bring their problems and find help. The staff provides confidential counseling and referral services at no charge for any type of problem, personal or work-related, large or small. To make an appointment, call x68279.

Congratulations to the "MAP" Winners

Thirteen campus and 14 Medical Center employees, all members of the "Management & Professional" program, have been honored with 1989 incentive awards.

Award winners from the campus are: Barbara Atkinson, Office of Public Service Programs; Freeman Bradley, Research & Development Laboratory; Harry Cordon, Internal Audit; Robert Duca, Surgery; Patricia Franks, Institute for Health Policy Studies; Denly Herbert, Predoctoral Dental Clinic; Conrad Huang, School of Pharmacy; Mark Jordan, Alumni Affairs; Matthew Messner, Pediatrics; Peter Ng, Educational Media Resources; Jane Powers, Accounting; Christopher Slaboszewicz, Business & Fiscal Services; and Gayla Tyson, Development & Training.

From the Medical Center: Michael Cunningham, Pharmaceutical Services; Star Deppe, Materiel Services; Steve Downs, Hospital Accounting; Reece Fawley, Planning and Marketing; Lori Howell, Nursing; Linda Mann, Nursing; Marcellus Martin, Hospital Accounting; Lois McGrath, Nursing-ACC; Patrick McMullen, Clinical Labs; Eric Saltmarsh, Hospital Finance; Susan Semonoff, Hospital Finance; Dan Shydler, Administration; Carol Viele, Nursing; and Suzanne Williams, Hospital Information Systems.

How are the Funds Performing?

For those invested in the additional savings programs, here are the latest unit values and monthly factors (as of February 28, 1989):

- *Accumulation Unit Values*
  Equity Fund: $53.50 (-3.0%)* (6.99%)**
  Bond Fund: $33.31 (-1.7%)* (1.64%)**
- *Monthly Factors*
  Savings Fund: .0063 (7.84%)***
  Money Market Fund: .0067 (8.38%)***
  GIC Fund: .0067 (8.42%)***

*Percentages represent change in unit value from previous month.

**Percentages represent total percentage increase over previous 12-month period.

***Percentages represent the most recent returns expressed as an annualized rate. The money market and savings rates change monthly.

Questions, call x61400.

Jobs

The Personnel Department, located at 1350 Seventh Avenue, is open to receive applications every weekday from 8 a.m. to 5 p.m. with extended hours on Wednesdays, 8 a.m. to 6:30 p.m. Details of jobs listed below are available in the UCSF Employment Opportunities flyers. Copies are distributed campuswide and also are posted at the Personnel Office and on the second floor of Moffitt Hospital.

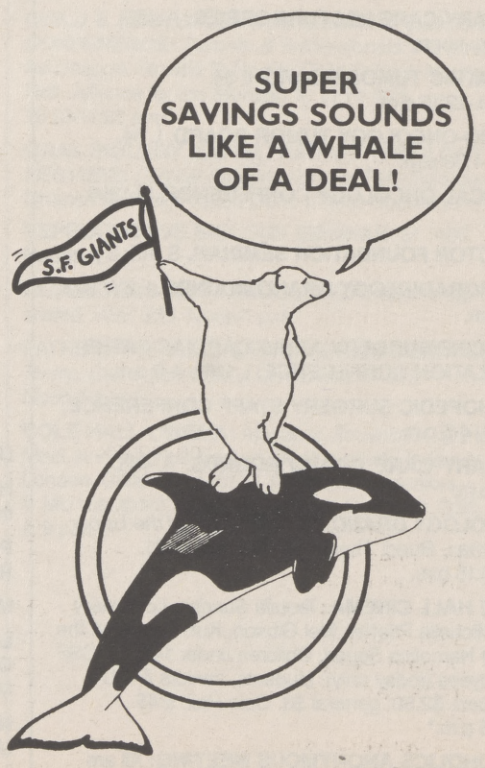
EMPACT!

Giants Tickets, Olympic Skaters, Disneyland, Santa Cruz Boardwalk—Get Your Discounts

Empact! has a bundle of spring discounts waiting for you. The following is only a partial list. Pick up discount packages or purchase tickets at the Millberry Union Central Desk. For further information, check the MU Central Desk or call EMPACT!, x66932.

- **Olympic & world ice skating champions**—sold out to the public already! Thursday, June 8, 8 p.m., Cow Palace. Tickets: $22.
- **San Francisco Giants Tickets**—April 15 through September 1. Lower reserve seats, $7.50-$8.50.
- **Disneyland Magic Kingdom Club**—discounts on tickets, hotel, merchandise, car rental and airfare.
- **Santa Cruz Boardwalk**—discounts on all-day ride ticket, Sunday brunch and big band dancing.
- **Sea World in San Diego**—20% discount on admission, guided tours, educational courses.
- **Costco**—One-day shopping pass plus discount on membership for UCSF employees.
- **Movie tickets**—$4.50 passes at more than 50 Bay Area theaters.
- **Magic Mountain, San Diego Zoo, Marine World Africa USA**—vacation kits and big discounts.



More EMPACT! news:

- Look in this column next issue for the winner of EMPACT's "decorate-an-Easter-egg-like-your-boss" contest.
- EMPACT! is seeking energetic volunteers to sell tickets for the "win a cruise to Alaska" raffle drawing on May 11. EMPACT! is trying to raise $10,000 for your benefit, so hurry up and help out. There are many incentives for volunteers—prizes and free tickets, etc. Of course, whether you volunteer or not, you'll want a chance at winning the cruise or one of many other huge prizes. Buy your tickets for $1 each at the MU Central Desk.

Need a Little Inspiration? Meet Fathers Flanagan and Flynn

Since St. Patrick's Day fell on an off week for *Medsounds* and this week is Easter, we'll call this the combined St. Patrick's Day/Easter issue. To mark the occasion, meet two more members of our Clinical Pastoral Education (CPE) Program, an Irish priest named Benny Flanagan and an Irish American musician-doctor-priest-turned-chaplain, Jack Flynn.

Father Flanagan, or "Benny," as he prefers to be called, is from Galway, Ireland—"one of the most beautiful places in the world." He's been a priest for 17 years; and one of his claims to fame is that he's a second cousin to Father Eddie Flanagan, the founder of Boys' Town in Omaha, Nebraska.

He came to the Bay Area a year ago January to work on his master's degree in pastoral theology, and enrolled in our CPE program this past January as a part of his course work. His tenure here is the last leg of an extensive sojourn away from his native Ireland.

Beginning in 1981, he spent six years in Kenya, largely teaching agricultural and survival skills to an economically deprived population. Eighteen months ago he began what he calls his transition back to his homeland, a period filled with experiences to broaden his horizons—or, as he puts it, to give him "a more global view."

Upon leaving Africa, he spent three months traveling through Asia, including Thailand, the Philippines, Hong Kong, India and Nepal, where he spent a week working in Mother Teresa's home for the destitute and dying.

His time in the United States has been divided between studies at Berkeley's Graduate Theological Union, USF's master's program and our CPE program, where his concentration has centered on working with people in grief. By the end of May, he expects to complete his degree, at which time he'll head for home—at last.

Fathers Flanagan (left) and Flynn, singing Irish tunes at the chaplains' St. Patrick's Day fest. As is the tradition for this annual gathering, Mary Connaughton, a chaplain from St. John of God and another native of Ireland, made soda bread—and chaplain Rod Seeger served Irish coffee.

If his life seems rather full, it only reflects his philosophy. He says he believes we are given life in order to live it to the fullest. If we are endowed with certain gifts or talents, we should put them to use. And when opportunities come our way, we should take them.

Father Jack Flynn's original identity, you might say, was as a musician. A native Southern Californian of Irish extraction, he worked his way through college and medical school playing the piano in night clubs and with a dance band.

Thus, he added "doctor" to his identity. Five years into his practice as a radiologist, when he was in his mid-30s, he decided to join the Jesuit order of the Catholic Church.

Nine years later, in 1969, he was ordained a priest; then continued to pursue an illustrious career in medicine as part of his Jesuit mission.

During a fellowship at UCLA in nuclear medicine he trained himself in diagnostic ultrasound and pioneered the use of ultrasound for diagnosing heart conditions. He subsequently headed the diagnostic ultrasound division at the UC Irvine Medical Center for nine years, then held a similar position at a UCLA-affiliated hospital for seven years.

Last year, he embarked upon another career switch: "I finally decided to devote full time to ministering to the spiritual needs of patients." In June, when he completes his CPE training, he'll become a full-time chaplain—probably back in his native LA.

And what about his music? He's as active as ever. He collects jazz, picks up pieces from the recordings, and jams in a jazz club in LA. He also holds his own with Irish tunes—that was Father Flynn who was the life of the party at the chaplains' St. Patrick's Day fest last week.

One of his favorite jazz artists is another doctor—Langley Porter's Denny Zeitlin. "Among contemporary jazz greats, he's right up there on top."

"We Never Promised You a Rose Garden, But You Deserved It"

The other day, Materiel Services' Kaylee Chun walked into a conference room expecting to attend a meeting, but instead found a big surprise party in her honor. The whole staff was there, plus President Bush and Vice President Quayle. (Actually, they were not there, but Bill Kerr and Dan Shydler were.) Kaylee was presented with a cake, presents, a buffet and 17 roses—one for each year she's worked here.

Why the big to-do?

"One reason," explained Materiel Services director Star Deppe, "is that she had perfect attendance in 1988. She didn't miss a day of work the entire year. Furthermore, she's a great person and an outstanding member of our staff. The rest of the staff just wanted her to know how much we appreciate her."

We Repeat: "Get That Hepatitis B Vaccine"

Members of the Infection Control and Employee Health staffs say they are extremely pleased by the response to the recent article urging people to take advantage of our Hepatitis B vaccination program.

"Still, only about half the people who should take advantage of the program actually are," says infection control nurse Marilyn Jordan. The program is free for staff and students who have frequent contact with blood. (Faculty pay a small fee.)

Here's what you do: UCSF staff and faculty can just show up at Employee Health, Room 440 in the ACC, anytime between 8:30 a.m. and 4:30 p.m., Monday through Friday. No appointment necessary. Students should go through the Student Health Service. And UCSF staff working at SFGH should contact the SFGH Employee Health Service.

Marilyn also urges nursing units and other groups to see their "terrific new film" on Hepatitis B. Call x60640 to arrange.

Amanda *(continued)*

wasted condition, she could not undergo hemodialysis on an artificial kidney machine. Because she suffered from severe peritonitis—an inflammation of the lining of the abdominal cavity—she could not tolerate peritoneal dialysis, in which waste products pass through the abdominal lining.

In an unusual surgical approach, Amanda's two native kidneys were removed and then one donor kidney was transplanted into the cavity, all within the same four-hour procedure.

In standard kidney transplantation for patients whose kidneys have stopped functioning because of end-stage renal disease, the two native kidneys normally remain in place and a donor kidney is implanted adjacent to the site.

The happy ending to this saga is that Amanda is now in excellent health and was discharged last week. Furthermore, she made history. Oscar Salvatierra, who headed the surgery team, believes Amanda is the smallest child ever to undergo this unusual procedure.

Tiny Tots *(continued)*

transplant experience in small children now have led to extending kidney transplantation to infants only a few weeks old.

With current prenatal detection methods, many of the medical problems necessitating a kidney transplant in the newborn will be detected in the womb, and plans for the procedure will begin even before birth.

These problems include severely deformed kidneys or obstructions in the urinary system of the unborn fetus that lead to infection and deterioration of the kidney.

All donor kidneys for newborns will be from cadavers, usually from an infant because the organs are of the appropriate size. In some instances, donor organs from a child or small adult will be used.

The UCSF kidney transplant team for children also includes pediatric nephrologists Donald Potter and Anthony Portale and transplant coordinator Danielle Newman, RN.

Overall, our Kidney Transplant Service has performed more than 3,200 transplants in children and adults since it was established 25 years ago—making it the largest program of its kind in the world.

UCSF/Mount Zion *(continued from page 1)*

health needs, but under this proposal we could provide even better service for the community," said Chancellor Krevans.

"The entire community would benefit from the combination of Mount Zion and UCSF to provide patient care, teaching and research," said David H. Melnick, chair of the Mount Zion Board of Directors. "Many of the Mount Zion medical staff already are members of the UCSF faculty. We feel this partnership is a natural extension of a longstanding relationship."

Melnick added that "given the economic forces in the San Francisco hospital community and the changing national education requirements, it is questionable whether Mount Zion, or any other community teaching hospital, could satisfy its mission in the future as a stand-alone institution."

"We are enthusiastically looking forward to strengthened relationships with the Mount Zion medical staff," Krevans said. "Mount Zion's commitment to the training of physicians, excellent patient health care services and research would be of great benefit in the teaching program.

"Our students and house staff," he added, "need exposure to patients treated by physicians engaged in practice at a community hospital like Mount Zion to complement the experience gained in tertiary care hospitals, including UCSF's Moffitt/Long and the affiliated SFGH and VAMC, where UCSF faculty do all the patient care, teaching and research."

Current programs between Mount Zion and UCSF include the Joint Perinatal Program for Mothers and Newborn Babies, the Center for Aging Service Research, the Center for Biomedical Research on Aging, a merged home care program and joint programs in some areas for training house staff residents and medical students. UCSF and Mount Zion also collaborate on research programs in diabetes, infant respiratory distress syndrome, AIDS, and the social and physiological processes of aging.

To keep pace with the most advanced medical technology and patient care needs, UCSF has been looking toward developing new programs in certain medical specialty areas. These plans would not be feasible without additional space.

For example, a comprehensive cancer program at Mount Zion would provide a variety of therapeutic treatments, radiology and other diagnostic procedures for patients. A collaborative research program would speed the search for treatments for this dread disease.

Another possibility for a more unified effort would be a new pediatric rehabilitation and chronic care program developed at Mount Zion to care for children who are developmentally disabled, in need of acute care and rehabilitation, or who have been discharged from intensive care units with some chronic or continuing disability. Such a program is badly needed in the community. The program could build on current strengths at both institutions.

Also under discussion are a combined diabetes patient education program and residency programs.

Under the proposed integration, there would be no increase in the 999 total licensed beds at UCSF and Mount Zion.

An extensive review of the financial considerations, physical space and employment issues surrounding the proposed integration is under way.

New Name for Child Study Unit

ACC's Child Study Unit has a new name: "The Division of Behavioral and Developmental Pediatrics." The new name not only better reflects the activities conducted, it's more in keeping with the other components of the Department of Pediatrics (Division of Adolescent Medicine, etc.). The Division of Behavioral and Developmental Pediatrics provides diagnostic and counseling services to children and adolescents who have learning, developmental, physical and/or behavioral problems. The unit is located on the second floor of the ACC, along with the other pediatric clinics.

Start Thinking About Where You'd Like to "Spend a Day"

If there's an area of the Medical Center that particularly interests you, here's your chance to get an insider's view of that department.

In celebration of National Nurses' Day and National Hospital Week, the annual "Spend a Day" program will take place the first two weeks of May.

During these two weeks, anyone from any department on campus is invited to come spend an hour with a Medical Center department. People who have taken advantage of this program in the past have said that one of the best things about it is the chance to get to know and share ideas on a face-to-face basis with colleagues.

Visits with inpatient nursing units and ACC departments will be scheduled for the week of Monday, May 1, through Friday, May 5. Sign-ups for these departments will take place from Monday, April 17 to Friday, April 21.

Visits with other Medical Center departments will be scheduled for the week of Monday, May 8, through Friday, May 12. Sign-ups for these departments will take place from Monday, April 24, through Friday, April 28.

Meet this year's "Spend-a-Day" coordinators: Admitting manager Joanne Pehkonen (left) is coordinator for hospital departments other than nursing, 8 NE head nurse Margie Wolcott (right) is the coordinator for nursing units, and Nursing Administration's Melony Hamilton (center) is in charge of sign-ups.

To sign up, call Melony Hamilton at x62252. Sign-ups are first come, first served, so be sure to make your reservations early. In the past, some people were disappointed because they couldn't visit their first-choice department.

How will you know which departments are open to visitors? Almost all of them are, so you can just call and make a request. Also, prior to the sign-up time, we'll publish a list of departments in *Medsounds*, or you can look on the bulletin board outside Nursing Administration at L 171. If you don't see the department of your choice on this list, mention this to Melony, and maybe she can arrange something.

Take note: There is more than one way to participate. In addition to visiting another department, you can also serve as a host for your own department. The sign-ups for hosts will take place from Monday, April 3, through Friday, April 14. Be sure to tell your head nurse or supervisor if you're interested.

The PreSEP Program Is Up and Running!

If your daily path takes you down the hallway on the first floor of Long Hospital, no doubt you've noticed the construction going on in L 169, the former site of the family waiting room.

Two weeks ago, the construction job concluded, and last week the PreSEP program commenced in these brand new headquarters.

You will have your opportunity to personally tour the area during an open house in May. Meanwhile, here's a little background: PreSEP stands for "PreSurgical Evaluation Program." Basically, what PreSEP provides is a complete pre-operative testing, consultation and teaching program for morning admission surgical patients ("Come & Stay") and all outpatient surgical patients having their procedures done in the Moffitt/Long OR ("Come & Go").

One of the beauties of PreSEP is that it consolidates all the pre-operative functions into a centralized area. Thus, patients don't have to run all over the hospital trying to get everything done. The entire visit takes no more than two hours, including all routine lab, x-ray and EKG studies, consultation with an anesthesiologist, pre-surgical teaching by a member of the nursing staff, and the completion of admitting procedures and financial arrangements. How did it go during the first week of opening?

"Fine," said Joanne Pehkonen, manager of Admitting. "By the third day we had 23 or 24 patients scheduled." Typically, 25 to 30 patients a day will go through the program. PreSEP is part of a larger program of improved services for patients, all under the auspices of the Admitting Department. Another part of the program is the off-campus patient and family lodging that opened last summer.

The PreSEP staff: (left to right) Gina Palmo, Isabel Tallay, Pauline Gallardo, Nancy Cohen, Carolyn Clary-Macy and Nubia Nicholas. Isabel, Pauline and Nubia are pre-admit workers, Gina and Carolyn are RNs, and Nancy is the program manager. Robert Hickey (not pictured) is the PreSEP anesthesia consultant. And the flowers are from Administration's Ron Lipsy, the moving force behind the program.

Currently the PreSEP hours are 9 a.m. to 5 p.m. (this may change according to need), and blood-drawing hours have been expanded to 7:30 a.m. to 7 p.m. The phone number is x61097.

Kidney Transplants for Tiny Tots

Infants as small as 6.5 pounds now can undergo life-saving kidney transplant surgery here at the Medical Center.

The Med Center's Kidney Transplant Service is the only program in Northern California and one of a half-dozen programs nationwide that has attempted transplanting kidneys in small children.

The new program is an expansion of the Kidney Transplant Service's pediatric unit. More than 350 children have undergone transplantation through the unit, and of these, close to 50 have weighed between 14 and 30 pounds.

According to Kidney Transplant Service chief Oscar Salvatierra, the new program for infants has the potential for helping an estimated 50 babies born with defective kidneys each year in the Bay Area.

"Transplantation is the treatment of choice for children of all ages with end-stage renal disease, and a successful kidney transplant offers the best opportunity for normal life and minimizes the risk of neurological complications and growth retardation. Dialysis is an effective short-term bridge until transplantation can be performed," he said.

The current success rate for kidney transplantation—with no signs of rejection—in small children through the UCSF program is 80 percent after two years.

Extremely small blood vessels make transplant surgery in infants more difficult than in older children, explains Salvatierra, but microsurgery techniques and extensive

You'll Like This Story

Two-year-old Amanda Nazario of Mountain View was born with a rare, usually fatal disease in which her kidneys continually lost a protein called albumin.

The condition caused her to suffer from kidney disease, recurrent infections, growth retardation, a tendency to develop blood clots, dangerous accumulation of fluid within her lungs, abdomen and soft tissues, and general body wastage and protein depletion. Several months ago, blood clots caused the loss of the tips of her two little fingers.

The only way to permanently control the protein loss was to remove Amanda's kidneys, a surgical option for her disease that has been performed only about 10 times when the kidneys were still providing satisfactory function.

In most instances, the native kidneys are removed and the patient goes on dialysis. Then when the patient's health stabilizes after intensive nutritional and protein replacement, kidney transplantation is considered.

Dialysis was not an option for Amanda, however. Because of her small size and
